both the anal sphincter and rectal mucosa Third- and fourth-degree tears are called OASIS Perineal support should be performed at all deliveries Perineal trauma should be assessed by visual inspection and rectal examination and documented in the case files Anal sphincter ...

#### **Incidence of and risk factors for perineal trauma: a ...**

trauma following vaginal delivery, and a strong association between forceps delivery and perineal trauma Keywords: Vaginal delivery, Perineal trauma,OASIS,Prospectivestudy Background About 85% of women in the UK sustain some degree of perineal trauma during childbirth [1] Clinical diagnosis of obstetric anal sphincter injury (OASIS) comprising a

#### **Obstetric pelvic floor and anal sphincter injuries**

addition to direct trauma to the anal sphincter, perineal and levator ani muscles, stretching and possible tearing of the endopelvic fascia may lead to pelvic floor dysfunction<sup>17</sup> The much higher prevalence of incontinence and prolapse in later life may reflect the cumulative effects of covert obstetric

#### **Occult anal sphincter injuries—myth or reality?**

who sustained perineal trauma and found that 40% of OASIS were being missed In view of the anatomical confusion, inconsistency in clas-sification of perineal tears and evidence that OASIS are being missed, we aimed to determine the true prevalence of clin-ically overt and occult anal sphincter trauma in women having their first vaginal delivery

#### **Postpartum care of the perineum**

of obstetricians in obstetric anal sphincter injury Table 1 Definition ofspontaneous tears 3 Degree Trauma First Injury to the skin only Second Injury

to the perineum involving perineal muscles but not involving the anal sphincter Third Injury to the perineum involving the anal sphincter complex 3a: less than 50% of EAS thickness torn

### **PERINEAL TRAUMA (TEARS & EPISIOTOMY)**

Anterior perineal trauma Injury to labia, anterior vagina, urethra or clitoris Posterior perineal trauma Injury to posterior vaginal wall, perineal muscles or anal sphincters - may include disruption of the anal epithelium Classification of perineal tears Midwife/doctor must identify the extent of perineal trauma and document it according to

### **ASSESSMENT AND REPAIR OF PERINEAL TRAUMA**

posterior vaginal floor, the perineal body and the anal sphincter; The apex of the injury should be clearly identified and assessment of bleeding Assessment and Repair of Perineal Trauma/ 07066 / 70

### **REVIEW Management obstetric**

anal sphincter injury Raneer Thakar, Abdul H Sultan Obstetric anal sphincter trauma is the most common cause of faecal incontinence and can have a devastating effect on quality of life Therefore, recognition of the tear is utmost importance However, despite repair, up to 59% of women suffer from impaired faecal continence

### **Applied anatomy of the perineum and anorectum**

85% women who have a vaginal birth sustain some form of perineal trauma Approximately 350,000 women per year in the UK need sutures for perineal injury after spontaneous vaginal delivery 2nd degree = perineal muscles 3rd degree = anal sphincter 3a = <50% external sphincter thickness

### **CLINICAL PRACTICE GUIDELINE MANAGEMENT OF ...**

Anal sphincter tears following vaginal delivery are managed by primary anal sphincter repair although secondary procedures are described (Sorenson et al, 1993)

### **Autoethnography and severe perineal trauma—an unexpected ...**

Perineal trauma occurs during vaginal birth when injury is sustained to the perineum (the area between the vagina and the anal sphincter) Severe perineal trauma (SPT) is when injury occurs to the perineum with trauma extending to the anal sphincter complex (third degree tear); or a fourth degree tear, this involves injury

### **October 2018 Perineal Tears: A literature review**

Perineal trauma Refers to any trauma to the perineum during birth and includes perineal tears, obstetric anal sphincter injuries and episiotomies Primigravida A woman experiencing her first pregnancy Primipara : A pregnant woman who has had no previous pregnancy resulting in a live birth or stillbirth Primiparous Having given birth to one

### **The Management of Third- and Fourth-Degree Perineal Tears**
