Under the Wires at Tally Ho Aug 25 2019 Today pollution-free transport is high on the political agenda yet it is sometimes forgotten that electric vehicles ran on the streets of London from the early 1900s until 1962. This book tells the story of that period and describes both the vehicles themselves and the effect they had on the development of the suburbs. Local historian David Berguer has endeavoured to paint a picture of what life was like in the capital during this golden age, travelling and working on the trams and trolleybuses, and includes material based on newspaper reports, council and official minutes and oral histories from those involved. With many previously unpublished photographs and detail on the vehicles and routes themselves, there is even a chapter on the colourful pirate buses which competed against trams in the 1920s. Full of local interest and insights into daily life on north London trams and trolleybuses, this celebration of the glory days of electric street traction in the suburbs of North London is bound to capture the imagination of both transport and local historians alike.

The Future of Disability in America Apr 13 2021 The future of disability in America will depend on how well the U.S. prepares for and manages the demographic, fiscal, and technological developments that will unfold during the

next two to three decades. Building upon two prior studies from the Institute of Medicine (the 1991 Institute of Medicine's report *Disability in America* and the 1997 report *Enabling America*), *The Future of Disability in America* examines both progress and concerns about continuing barriers that limit the independence, productivity, and participation in community life of people with disabilities. This book offers a comprehensive look at a wide range of issues, including the prevalence of disability across the lifespan; disability trends the role of assistive technology; barriers posed by health care and other facilities with inaccessible buildings, equipment, and information formats; the needs of young people moving from pediatric to adult health care and of adults experiencing premature aging and secondary health problems; selected issues in health care financing (e.g., risk adjusting payments to health plans, coverage of assistive technology); and the organizing and financing of disability-related research. *The Future of Disability in America* is an assessment of both principles and scientific evidence for disability policies and services. This book's recommendations propose steps to eliminate barriers and strengthen the evidence base for future public and private actions to reduce the impact of disability on individuals, families, and society.

Combinatorics Jul 25 2019 *Combinatorics* deals with simple combinatorial problems, recurrence relations, and generating functions, particularly the binomial expansions. The book expounds on the general rules of combinatorics, the rule of sum, the rule of product, samples, permutations, combinations, and arrangements of subjects with various restrictions. The text also explains ordered or unordered partitions of numbers, geometric methods, random walk problems, and variants of the arithmetical triangle. One example of the use of combinatorics

is the choice of the number 3 in the genetic code. Another example involves the choice of crew for a spaceship where it is necessary to consider the psychological conditions of the applicants for space travel. The text also investigates the sieve of Eratosthenes whose problem concerns finding all the primes in the sequence of natural numbers from 1 to N. The book also tackles the application of power series to proof of identities, the binomial series expansion, decomposition into elementary fractions, and nonlinear recurrence relation. The book can be highly educational and interesting to students or academicians involved in mathematics, algebra, and statistics.

Between the Stops Sep 30 2022 This long-awaited memoir from one of Britain's best-loved celebrities - a writer, broadcaster, activist, comic on stage, screen and radio for nearly forty years, presenter of QI and Great British Bake Off star - is an autobiography with a difference: as only Sandi Toksvig can tell it. 'Between the Stops is a sort of a memoir, my sort. It's about a bus trip really, because it's my view from the Number 12 bus (mostly top deck, the seat at the front on the right), a double-decker that plies its way from Dulwich, in South East London, where I was living, to where I sometimes work - at the BBC, in the heart of the capital. It's not a sensible way to write a memoir at all, probably, but it's the way things pop into your head as you travel, so it's my way'. From London facts including where to find the blue plaque for Una Marson, 'The first black woman programme maker at the BBC', to discovering the best Spanish coffee under Southwark's railway arches; from a brief history of lady gangsters at Elephant and Castle to memories of climbing Mount Sinai and, at the request of a fellow traveller, reading aloud the Ten Commandments; from the story behind Pissarro's painting of Dulwich Station to performing in Footlights with Emma Thompson; from painful memoirs of being sent to Coventry while at a British boarding school to thinking about how Wombells Travelling Circus of 1864 haunts Peckham Rye; from anecdotes about meeting Prince Charles,

Monica Lewinsky and Grayson Perry to Bake-Off antics; from stories of a real and lasting friendship with John McCarthy to the importance of family and the daunting navigation of the Zambezi River in her father's canoe, this Sandi Toksvig-style memoir is, as one would expect and hope, packed full of surprises. A funny and moving trip through memories, musings and the many delights on the Number 12 route, *Between the Stops* is also an inspiration to us all to get off our phones, look up and to talk to each other because as Sandi says: 'some of the greatest trips lie on our own doorstep'.

Meet Me at the Bus Stop Nov 20 2021 Rosie has had enough high school drama to last her a lifetime. Bullied by the mean girls at her previous school she hopes the new school will be different. After all, this is a chance for her to start fresh and become whoever she wants to be. And though she isn't confident in her looks, she knows that her brilliant mind can be an asset in her new life. However, her goals begin to shift when she meets Liam, the most popular boy at her school, but someone with a bad reputation...Liam has spent his school career feeling misunderstood. With a hard outer shell, he spends his days in detention and getting into trouble. But he knows that he needs to improve his reputation in order to graduate. And what better way to do that than asking out the new girl? Liam asks Rosie to form an alliance and pretend to be his girlfriend. For her, it's a chance at being the one thing she wasn't at her old school: popular. And for him, it's a way to gain the trust and admiration of his teachers. But what begins as a simple arrangement becomes something much more complicated...As the first in its series, MJ Ray's "*Meet Me at the Bus Stop*" serves as a lovely and exciting introduction to charismatic characters and an intriguing story. For those looking for a sweet young adult romance, this is the perfect novel. Suitable for ages 13 to any age!

No. 91/92 Jan 11 2021 A love letter to Paris and a meditation on how it has changed in two decades, evolving from the twentieth century into the twenty-first, from analog to digital. Your telephone is precious. It may be envied. We recommend vigilance when using it in public. --Paris bus public notice In fall 2014 Lauren Elkin began keeping a

diary of her bus commutes in the Notes app on her iPhone 5c, writing down the interesting things and people she saw in a Perecquian homage to Bus Lines 91 and 92, which she took from her apartment in the 5th Arrondissement to her teaching job in the 7th. Reading the notice, she decided to be vigilant when using her phone: she would carry out a public transport vigil, using it to take in the world around her and notice all the things she would miss if she continued using it the way she had been, the way everyone does--to surf the web, check social media, maintain her daily sense of self through digital interaction. Her goal became to observe the world through the screen of her phone, rather than using her phone to distract from the world. During the course of that academic year, the Charlie Hebdo attacks occurred and Elkin had an ectopic pregnancy, requiring emergency surgery. At that point, her diary of dailiness became a study of the counterpoint between the everyday and the Event, mediated through early twenty-first century technology, and observed from the height of a bus seat. No. 91/92 is a love letter to Paris, and a meditation on how it has changed in the two decades the author has lived there, evolving from the twentieth century into the twenty-first, from analog to digital.

Peak 40 Jun 23 2019 Work smarter, not harder. The first guide to truly holistic health and fitness for those in their

40s From Tom Brady to Serena Williams, Tiger Woods and Roger Federer athletes are increasingly peaking later in their careers. Let Dr Marc Bubbs be your personal trainer in this accessible guide— aimed exclusively at those in their 40s. Create a customized program that works for YOU—from diet, to sleep, type of training and mindset, this book has all the tools you need. Peak 40 is for anyone wanting to rediscover the best version of themselves coming into their 40s. Author Dr Marc Bubbs is a performance nutritionist with a portfolio of professional and Olympic athletes - but he is also the dad of three girls, all under 7! Dr. Bubbs is here with you, in the eye of the mid-life storm, and he has created the ultimate book to help you through it. For fans of Joe Wicks and Michael Mosley, Dr. Bubbs offers simple, evidence-based and time-efficient strategies to help you reignite your energy and passion. His realistic, grown-up and non-judgemental approach is to explain the effect some food groups and lack of exercise and sleep have on our body. The information presented is easy to digest and he offers advice that can be tailored to your body and personality type. In his expert opinion, small changes such as ‘not eating after 8pm for five out of seven days’ can have a big impact on weight loss and positive mood. Rather than eliminating certain food groups like fats and carbohydrates, he looks at ‘turning the dial’ on them depending on individual needs. If life has become too sedentary, he provides ways to increase suppleness so that you can start to reintroduce movement into your life without causing pain. Guiding us through the myriad of confusion lifestyle messages, Dr. Bubbs teaches us: How to increase flexibility How to train with achy joints, knees, back, shoulders... Whether a plant-based diet is right How to maintain bone health Whether to lift weights Who should do HIIT (and who shouldn’t) The importance of glucose control in your diet Advice on dealing with anxiety and low mood How to set realistic expectations "[Bubbs] dives into the nutrition and science—where it’s been and where it’s heading."—Zack Bitter, world record-holding ultra marathoner, as heard on "The Joe Rogan Experience" "Dr. Bubbs's advice on nutrition, health, and recovery for peak performance has been a game changer!"—Kevin Pangos, point guard, Barcelona FC Basketball

Investigating Optimal Bus Routes. Planning and Operation in Urban Areas Feb 21 2022 Doctoral Thesis / Dissertation from the year 2015 in the subject Transportation Science & Technology, , course: Transit planning, language: English, abstract: Transit route Network Design Problem (TrNDP) is the most important component in Transit planning, in which the overall cost of the public transportation system highly depends on it. The main

purpose of this study is to develop a novel solution methodology for the TrNDP, which goes beyond previous traditional sophisticated approaches. The novelty of the solution methodology, adopted in this study, stands on the deterministic operators which are tackled to construct bus routes. The deterministic manner of the TrNDP solution relies on using linear and integer mathematical formulations that can be solved exactly with their standard solvers. The solution methodology has been tested through Mandl's benchmark network problem. The test results showed that the methodology developed in this research is able to improve the given network solution in terms of number of constructed routes, direct transit service coverage, transfer directness and solution reliability. Although the set of routes resulted from the methodology would stand alone as a final efficient solution for TrNDP, it could be used as an initial solution for meta-heuristic procedures to approach global optimal. Based on the presented methodology, a more robust network optimization tool would be produced for public transportation planning purposes.

The Lines That Make Us Oct 08 2020 Nathan Vass has been driving a Seattle city bus at night for the last decade. He began writing a popular blog, *The View from Nathan's Bus*, about his encounters with the riders of the No. 7 bus, which cuts through the heart of the city's Rainier Valley, one of the most racially and ethnically diverse zip codes in the US. Nathan's blog entries grew into this book. His stories and photography illuminate an overlooked part of urban life and highlight the simple connections people make on a daily basis. His depictions of interactions on the city bus range from heartbreaking to hilarious to inspiring.

Geocomputation with R Aug 18 2021 Geocomputation with R is for people who want to analyze, visualize and model geographic data with open source software. It is based on R, a statistical programming language that has powerful data processing, visualization, and geospatial capabilities. The book equips you with the knowledge and skills to tackle a wide range of issues manifested in geographic data, including those with scientific, societal, and environmental implications. This book will interest people from many backgrounds, especially Geographic Information Systems (GIS) users interested in applying their domain-specific knowledge in a powerful open source language for data science, and R users interested in extending their skills to handle spatial data. The book is divided into three parts: (I) Foundations, aimed at getting you up-to-speed with geographic data in R, (II) extensions, which covers advanced techniques, and (III) applications to real-world problems. The chapters cover progressively more

advanced topics, with early chapters providing strong foundations on which the later chapters build. Part I describes the nature of spatial datasets in R and methods for manipulating them. It also covers geographic data import/export and transforming coordinate reference systems. Part II represents methods that build on these foundations. It covers advanced map making (including web mapping), "bridges" to GIS, sharing reproducible code, and how to do cross-validation in the presence of spatial autocorrelation. Part III applies the knowledge gained to tackle real-world problems, including representing and modeling transport systems, finding optimal locations for stores or services, and ecological modeling. Exercises at the end of each chapter give you the skills needed to tackle a range of geospatial problems. Solutions for each chapter and supplementary materials providing extended examples are available at <https://geocompr.github.io/geocompkg/articles/>. Dr. Robin Lovelace is a University Academic Fellow at the University of Leeds, where he has taught R for geographic research over many years, with a focus on transport systems. Dr. Jakub Nowosad is an Assistant Professor in the Department of Geoinformation at the Adam Mickiewicz University in Poznan, where his focus is on the analysis of large datasets to understand environmental processes. Dr. Jannes Muenchow is a Postdoctoral Researcher in the GIScience Department at the University of Jena, where he develops and teaches a range of geographic methods, with a focus on ecological modeling, statistical geocomputing, and predictive mapping. All three are active developers and work on a number of R packages, including `stplanr`, `sabre`, and `RQGIS`.

The Lost Ticket Jun 15 2021 Strangers on a London bus unite to help an elderly man find his missed love connection in the heartwarming new novel from the acclaimed author of *The Last Chance Library*. When Libby Nicholls arrives in London, brokenhearted and with her life in tatters, the first person she meets on the bus is elderly Frank. He tells her about the time in 1962 that he met a girl on the number 88 bus with beautiful red hair just like hers. They made plans for a date at the National Gallery art museum, but Frank lost the bus ticket with her number on it. For the past sixty years, he's ridden the same bus trying to find her, but with no luck. Libby is inspired to action and, with the help of an unlikely companion, she papers the bus route with posters advertising their search. Libby begins to open her guarded heart to new friendships and a budding romance, as her tightly controlled world expands. But with Frank's dementia progressing quickly, their chance of finding the girl on the 88 bus is slipping away. More than

anything, Libby wants Frank to see his lost love one more time. But their quest also shows Libby just how important it is to embrace her own chances for happiness—before it's too late—in a beautifully uplifting novel about how a shared common experience among strangers can transform lives in the most marvelous ways.

Politics Without Sovereignty Jul 29 2022 Written by leading scholars, this volume challenges the recent trend in international relations scholarship – the common antipathy to sovereignty. The classical doctrine of sovereignty is widely seen as totalitarian, producing external aggression and internal repression. Political leaders and opinion-makers throughout the world claim that the sovereign state is a barrier to efficient global governance and the protection of human rights. Two central claims are advanced in this book. First, that the sovereign state is being undermined not by the pressures of globalization but by a diminished sense of political possibility. Second, it demonstrates that those who deny the relevance of sovereignty have failed to offer superior alternatives to the sovereign state. Sovereignty remains the best institution to establish clear lines of political authority and accountability, preserving the idea that people shape collectively their own destiny. The authors claim that this positive idea of sovereignty as self-determination remains integral to politics both at the domestic and international levels. *Politics Without Sovereignty* will be of great interest to students and scholars of political science, international relations, security studies, international law, development and European studies.

The 57 Bus Oct 20 2021 One teenager in a skirt. One teenager with a lighter. One moment that changes both of their lives forever. If it weren't for the 57 bus, Sasha and Richard never would have met. Both were high school students

from Oakland, California, one of the most diverse cities in the country, but they inhabited different worlds. Sasha, a white teen, lived in the middle-class foothills and attended a small private school. Richard, a black teen, lived in the crime-plagued flatlands and attended a large public one. Each day, their paths overlapped for a mere eight minutes. But one afternoon on the bus ride home from school, a single reckless act left Sasha severely burned, and Richard charged with two hate crimes and facing life imprisonment. The 57 Bus is Dashka Slater's true account of the case that garnered international attention and thrust both teenagers into the spotlight.

Costa Rica by Bus Sep 18 2021 Costa Rica by Bus, the insider's guide to budget travel, is the only travel guide that gives you complete, up-to-date information about Costa Rica's extensive, inexpensive public transportation system, a system that can take you almost anywhere in this remarkably beautiful country, border to border and coast to coast at minimal cost. The system consists of more than 550 routes served by more than 350 privately owned bus companies that work together to provide reliable service to cities, towns, and tourist destinations. The guide contains information about routes, schedules, fares, and where to find your bus. Moreover, it gives many travel tips based on the experiences of the author, a Costa Rica resident who rides the bus. It also includes information about international bus connections to and from Panama, Nicaragua, Honduras, San Salvador, Guatemala, and Mexico and domestic air connections via Sansa and Nature Air. And, to help you communicate with the Ticos as you travel, the guide contains a traveler's glossary.. This 200-page guide is concise, complete, and organized in a manner to help you quickly find the information you are looking for. It is the ideal companion to other guides, many of which assume that you will rent a car and drive, an alternative the author does not recommend.
