The Queen of All Poisons Nov 05 2022 A Boston physician becomes an assassin for the U.S. government in this medical suspense thriller by an award-winning pathologist. "Hidden under a cloak of legitimacy, I have been pressed to deliver extraordinary service for my country. It has been a successful ruse. A premium blend of dark deception with just an aroma of truth."—Dr. Lily Robinson Dr. Lily Robinson is a brilliant physician with an encyclopedic knowledge of all toxins and poisons...and a penchant for stilettos. Then in a sudden twist, the United States government appeals to her patriotism—and her knowledge of how to kill without bloodshed—to rid the world of threats to our nation. Emotionally blunted and flawed, she struggles to move between assassin and healer, yet still able to fulfill her competing objectives. Now asked to assassinate a terrorist threatening New York City, she quickly realizes the Russians have already released a deadly toxin in a surprisingly innocuous medium.

Ecohumanism Oct 31 2019 Humanists are sometimes accused of being so focused on the human race that they ignore the environment and other species. This book is designed to address these criticisms. The contributors, all humanists in the naturalistic tradition, show that in fact humanism as a worldview has much to offer environmentalism. Since humanists are committed to working for a global community in which all humans can flourish, they are as concerned about ecological degradation as environmentalists. But in regard to what should be done about environmental problems, humanists do not hesitate to use the best scientific information and technology to reclaim the natural world while ensuring the welfare of all human beings. Humanists stress that science and technology must be used responsibly and that human beings must learn to give up destructive ideological fantasies, whether political or religious. The contributors are Vern L. Bullough, Gwen Whitehead Brewer, Richard Gilbert, Michael J. Kami, Gerald Larue, Timothy J. Madigan, Sarah Oelberg, Don Page, Howard B. Radest, Philip J. Regal, Andreas Rosenberg, Harvey Sarles, David Schafer, John M. Swomley, Robert B. Tapp, Michael Werner, and Carol Wintermute.

The Dream of the Great American Novel Oct 04 2022 The first book in many years to take in the full sweep of national fiction, *The Dream of the Great American Novel* explains why this supposedly antiquated idea continues to thrive. It shows that four G.A.N. "scripts" are keys to the dynamics of American literature and identity--and to the myth of a nation perpetually under construction.

To the Top! Apr 29 2022 Illus. in full color. Here is the gripping story of Hillary and Norgay's perilous ascent of Mount Everest as they battled snow and ice slides, whipping winds, and the grim knowledge that 19 others had died in the same attempt.

Uncertainty Oct 12 2020 Jonathan Fields knows the risks-and potential power-of uncertainty. He gave up a six-figure income as a lawyer to make \$12 an hour as a personal trainer. Then, married with a 3-month old baby, he signed a lease to launch a yoga center in the heart of New York City. . . the day before 9/11. But he survived, and along the way he developed a fresh approach to transforming uncertainty, risk of loss, and exposure to judgment into catalysts for innovation, creation, and achievement. Properly understood and harnessed, fear and uncertainty can become fuel for creative genius rather than sources of pain, anxiety, and suffering. In business, art, and life, creating on a world-class level demands bold action and leaps of faith in the face of great uncertainty. But that uncertainty can lead to fear, anxiety, paralysis, and destruction. It can gut creativity and stifle innovation. It can keep you from taking the risks necessary to do great work and craft a deeply-rewarding life. And it can bring companies that rely on innovation grinding to a halt. That is, unless you know how to use it to your advantage. Fields draws on leading-edge technology, cognitive-science and ancient awareness-focusing techniques in a fresh, practical, non-dogmatic way. His approach enables creativity and productivity on an entirely different level and can turn the once-tortuous journey into a more enjoyable quest. Fields will reveal how to: Make changes to your workflow that unlock buried creative potential. Build "creation hives" -- supportive groups that can supercharge and humanize the process. Tap social technology and user co-creation to add clarity, certainty, and sanity, even if you're an artist or solo-creator. Develop a set of personal practices and mindset shifts that let you not just tolerate, but invite and even amplify, uncertainty as a catalyst for genius. Drawing on extensive case studies and research, Fields shares a set of detailed personal practices and environmental changes that can not only humanize the creative process, but also allow individuals and teams to stay more open to opportunity and play a bigger creative game.

[Kant's Philosophy of Physical Science](#) Dec 14 2020 The papers in this volume are offered in celebration of the 200th anniversary of the publication of Immanuel Kant's *The Metaphysical Foundations of Natural Science*. All of the essays (including the Introduction) save two were written especially for this volume. Gernot Bohme's paper is an amended and enlarged version of one originally read in the series of lectures and colloquia in philosophy of science offered by Boston University. My own paper is a revised and enlarged version (with an appendix containing completely new material) of one read at the biennial meeting of the Philosophy of Science Association held in Chicago in 1984. Why is it important to devote this attention to Kant's last published work in the philosophy of physics? The excellent essays in the volume will answer the question. I will provide some schematic comments designed to provide an image leading from the general question to its very specific answers. Kant is best known for his monumental *Critique of Pure Reason* and for

his writings in ethical theory. His "critical" philosophy requires an initial sharp division of knowledge into its theoretical and practical parts. Moral perfection of attempts to act out of duty is the aim of practical reason. The aim of theoretical reason is to know the truth about material and spiritual nature.

Your DNA Guide - the Book Feb 13 2021 You don't have to learn everything about genetic genealogy before asking specific questions of your DNA! That's the premise of Diahn Southard's brand new book, *Your DNA Guide - the Book*, now available for pre-order at a special sale price. *Your DNA Guide - the Book* is like no other genetic genealogy book on the market. Instead of learning more-than-you-need-to-know in textbook style, you'll choose a specific DNA question to start exploring right away. You'll follow concrete step-by-step plans, learning important DNA concepts--in plain English--as you go. Do you want to learn who your 2X great grandmother is? Turn to page 23. Do you want to know how you are related to one of your DNA matches? Page 37. As you proceed, you check your progress and get new guidance based on your specific results at each stage. (Including troubleshooting, like when your matches just aren't responding or your great-grandparents turn out to be first cousins.) This powerful, hands-on approach is based on Diahn's 20 years of experience in the genetic genealogy industry and especially in the past five years, as she helps clients one-on-one make DNA discoveries. It became clear to her that while each client's situation may be unique, there are patterns in how you can find solutions that you can apply yourself. *Your DNA Guide - the Book* is for anyone who has taken a DNA test or may want to. It helps genealogists reconstruct family trees. It helps adoptees identify biological relatives. It can help you identify a specific DNA match. In short, it helps anyone explore what their DNA--and their DNA matches--can tell them about their origins.

Pheromone May 31 2022 Christopher Marley's graceful arrangements of jewel-like arthropods make converts of those who have long seen insects as creepy--these are stunning works of art. Marley's keen eye for design combines with his entomological education to produce mesmerizing, kaleidoscopic bug mandalas and striking up-close-and-personal single-insect portraits. Neither painted nor digitally enhanced, the artist's subjects appear in this book just as they would if you found one on your screen door. Each gorgeous creation is identified with its scientific and common names, and many are accompanied by concise descriptive text. In succinct essays, Marley writes about insect collecting and its benefits to the environment; he describes his creative process in choosing and arranging the creatures for optimal visual effect. After a childhood spent running from every creature that skittered about on more than four legs, Marley has devoted much of his adult life to studying bugs--with increasing fascination. He makes frequent forays to remote locations far removed from his home in Oregon, seeking out the most beautiful and exotic species on Earth.

Wikipedia @ 20 Aug 02 2022 Wikipedia's first twenty years: how what began as an experiment in collaboration became the world's most popular reference work. We have been looking things up in Wikipedia for twenty years. What began almost by accident--a wiki attached to an nascent online encyclopedia--has become the world's most popular reference work. Regarded at first as the scholarly equivalent of a Big Mac, Wikipedia is now known for its reliable sourcing and as a bastion of (mostly) reasoned interaction. How has Wikipedia, built on a model of radical collaboration, remained true to its original mission of "free access to the sum of all human knowledge" when other tech phenomena have devolved into advertising platforms? In this book, scholars, activists, and volunteers reflect on Wikipedia's first twenty years, revealing connections across disciplines and borders, languages and data, the professional and personal.

Reconceptualizing STEM Education Mar 29 2022 *Reconceptualizing STEM Education* explores and maps out research and development ideas and issues around five central practice themes: Systems Thinking; Model-Based Reasoning; Quantitative Reasoning; Equity, Epistemic, and Ethical Outcomes; and STEM Communication and Outreach. These themes are aligned with the comprehensive agenda for the reform of science and engineering education set out by the 2015 PISA Framework, the US Next Generation Science Standards and the US National Research Council's A Framework for K-12 Science Education. The new practice-focused agenda has implications for the redesign of preK-12 education for alignment of curriculum-instruction-assessment; STEM teacher education and professional development; postsecondary, further, and graduate studies; and out-of-school informal education. In each section, experts set out powerful ideas followed by two eminent discussant responses that both respond to and provoke additional ideas from the lead papers. In the associated website highly distinguished, nationally recognized STEM education scholars and policymakers engage in deep conversations and considerations addressing core practices that guide STEM education.

Atlas of Echocardiography Jan 03 2020 The second edition of the *Atlas of Echocardiography* is a complete reference for cardiology professionals who rely on echocardiographic imaging techniques. The Atlas represents

the collective effort of over 30 leading authorities in the field of cardiology working together to compile the most up-to-date and pertinent information in the field of echocardiography. All areas of echocardiography are covered, from diagnostic basics to cutting edge techniques, such as three-dimensional imaging, contrast imaging, and tissue Doppler imaging. Each figure is accompanied by an informative legend that fully explains the image and its importance. This striking, four color atlas serves as both a resource and a reference and is an invaluable tool to all readers, including cardiologists, non-cardiologist physicians, and sonographers.

Type-Logical Syntax Nov 12 2020 A novel logic-based framework for representing the syntax-semantics interface of natural language, applicable to a range of phenomena. In this book, Yusuke Kubota and Robert Levine propose a type-logical version of categorial grammar as a viable alternative model of natural language syntax and semantics. They show that this novel logic-based framework is applicable to a range of phenomena—especially in the domains of coordination and ellipsis—that have proven problematic for traditional approaches. The type-logical syntax the authors propose takes derivations of natural language sentences to be proofs in a particular kind of logic governing the way words and phrases are combined. This logic builds on and unifies two deductive systems from the tradition of categorial grammar; the resulting system, Hybrid Type-Logical Categorial Grammar (Hybrid TLCG) enables comprehensive approaches to coordination (gapping, dependent cluster coordination, and right-node raising) and ellipsis (VP ellipsis, pseudogapping, and extraction/ellipsis interaction). It captures a number of intricate patterns of interaction between scopal operators and seemingly incomplete constituents that are frequently found in these two empirical domains. Kubota and Levine show that the hybrid calculus underlying their framework incorporates key analytic ideas from competing approaches in the generative syntax literature to offer a unified and systematic treatment of data that have posed considerable difficulties for previous accounts. Their account demonstrates that logic is a powerful tool for analyzing the deeper principles underlying the syntax and semantics of natural language.

Kant and the Claims of Knowledge Dec 26 2021 This book offers a radically new account of the development and structure of the central arguments of Kant's Critique of Pure Reason: the defense of the objective validity of such categories as substance, causation, and independent existence. Paul Guyer makes far more extensive use than any other commentator of historical materials from the years leading up to the publication of the Critique and surrounding its revision, and he shows that the work which has come down to us is the result of some striking and only partially resolved theoretical tensions. Kant had originally intended to demonstrate the validity of the categories by exploiting what he called 'analogies of appearance' between the structure of self-knowledge and our knowledge of objects. The idea of a separate 'transcendental deduction', independent from the analysis of the necessary conditions of empirical judgements, arose only shortly before publication of the Critique in 1781, and distorted much of Kant's original inspiration. Part of what led Kant to present this deduction separately was his invention of a new pattern of argument - very different from the 'transcendental arguments' attributed by recent interpreters to Kant - depending on initial claims to necessary truth.

The Death of Peter Pan Dec 02 2019 To fall in love, really in love, would be an awfully big adventure. Renowned Scottish playwright, James Matthew Barrie, lies abed, unable to sleep, dreading the anniversary of one of the most tragic moments of his life. Lulled by the persuasive power of the syringe, he falls into a fitful sleep as the events play out in his mind. It's Armistice Night in London and Michael Llewelyn Davies, one of Barrie's adopted sons and one of the models for Peter Pan, celebrates with friends when he runs into the mysterious Rupert Buxton. They meet again in Paris, and later at Barrie's retreat on the Scottish island of Eilean Shona where the relationship between the two men becomes passionate. Will their love survive the censure of 1920s England, and will it destroy James Barrie's reputation? Love sometimes has tragic consequences. Based on a true story. Excerpt: BARRIE: (addresses the audience) I miss them, my poor dead boys. I should like to see them one more time but I know that no one should come back no matter how much he is loved. But I did dream that Michael came back to me. I dreamed we had an extra year together and during that time we lived quite ordinarily though strangely close to each other. I did some things that I had wanted to do before but until then had not dared do. I had fears of spoiling him and struggled not to do it. In agony I let him go away sometimes, to live the ordinary life of youth. The sound of fireworks and merriment. Eton. Armistice night: November, 1918. BASSETT, SENHOUSE and MICHAEL LLEWELYN DAVIES stagger on slightly drunk, banging tin bath tubs. Other sounds of celebration off. BASSETT: Righto, Davies, down on your knees and thank your own particular gods the war is over just one day before your call-up. SENHOUSE: I don't really think James Barrie had anything to do with it, Bassett. MICHAEL: I should not be a bit surprised if old Uncle

Jim did have something to do with ending the war. BASSETT: Confound his interference! And just as we were winning, too. They all laugh. SENHOUSE: And where is the gentleman who is the topic of our conversation? MICHAEL: In Paris. In the thick of it. BASSETT: Heaven help our fighting men. SENHOUSE: You can be a frightful bounder sometimes, Bassett. MICHAEL: He set up a hospital and nursing home in memory of my brother George. BASSETT: I say, Davies, I am awfully sorry. I was only teasing. Sound of fireworks. MICHAEL: Let's go and watch the fireworks. BASSETT: You know what the Housemaster said about being back in our rooms by curfew. SENHOUSE: Don't be such a wet blanket, Bassett. Nobody is taking any notice of the rules tonight. I'll wager even the Housemaster himself will be at the fireworks. I'm game if you are, Davies. MICHAEL: I'm game. What about you, Bassett? BASSETT: Oh, all right. But we mustn't be too late back. They whoop and rush about. Michael accidentally bumps into a stranger who has appeared. RUPERT BUXTON is dressed as an aesthete. Michael has run into Buxton but it is Buxton who apologises. BUXTON: I do beg your pardon, that was most careless of me. He smiles and moves on as Michael and the others glare at him. BASSETT: Did you see the way he dresses? SENHOUSE: And that hair! BASSETT: I should like to give the scoundrel a good thrashing. He brings Eton into disrepute. Buxton turns to address them. BUXTON: Ah, but I do not attend Eton, my good sirs. I come from Harrow. SENHOUSE: Come on, Davies. We'll miss the best part of the fireworks. MICHAEL: You go ahead. I'll be along presently.

Love by Night Jul 01 2022 More of a story than a collection of poetry, Love by Night will whisk you away from your world and into the dreamy romantic night. Love by Night begins with anxious hesitation and nervous attraction, grows into tender affection, blossoms into passionate love, delves deep into whimsical dreams, and finally builds an image of an idyllic future together, as the reader develops along with the two characters of this poetic story. Written as a conversation between two points of view in constant change and flux with each other, this book invites the reader into the conversation about the love that connects one person to another, but also all of us to each other. Through this written testament to the emotional journeys books can take us on, S. K. Williams breaks down stereotypes, sexism, relationship roles, and brings awareness to mental health, grief, anxiety, depression, how to move forward, how to love in a healthy way, and, most of all, how to love yourself when it feels impossible.
