Letters from Russia Aug 30 2022 The Marquis de Custine's unique perspective on a vast, fascinating country in the grip of oppressive tyranny In 1839, encouraged by his friend Balzac, Custine set out to explore Russia. His impressions turned into what is perhaps the greatest and most influential of all books about Russia under the Tsars. Rich in anecdotes as much about the court of Tsar Nicholas as the streets of St Petersburg, Custine is as brilliant writing about the Kremlin as he is about the great northern landscapes. An immediate bestseller on publication, Custine's book is also a central book for any discussion of 19th century history, as - like de Tocqueville's Democracy in America - it dramatizes far broader questions about the nature of government and society.

The Romanov Empire and Nationalism Jul 17 2021 Russian historiography has focused on the power of the central state. The national historiographies of the peoples that were once part of the empire, on the other hand, concentrate on their own nation, and the empire for them is only a burdensome context in which a particular nation was "waking up," and fighting for independence. Miller addresses the fabric of interaction between the imperial authority and local communities in the Romanov empire. How did the authorities structure the space of the empire? What were the economic relations between the borderlands and the centre? How was the use of different languages regulated? How did the central authorities and local officials implement policies regarding different population groups? How did the experience, acquired in particular borderlands, influence the policies elsewhere--among others--through officials who often changed their place of service during their careers? How did the local elites and communities react to the policies of the imperial authorities? How did they uphold their special interests if the empire encroached on them, but also--how did they collaborate with the empire and how did they use imperial resources for local interests?

Les Femmes dans les livres scolaires Jan 23 2022 Het boek is de neerslag van een onderzoek naar het gebruik van seksestereotypen in schoolboeken voor het secundair onderwijs in België. Men komt tot de conclusie dat de vrouw ofwel wordt getoond in een onderworpen rol, ofwel wordt ontkend dat ze sowieso een rol speelt, of heeft gespeeld, in de maatschappij. Dit wordt overvloedig geïllustreerd voor de verschillende vakken. Verder wordt er gepeild naar de impact van deze stereotypering op jongeren; of welke invloed kan het seksisme in de schoolboeken hebben op de leerlingen? Een pleidooi dus voor een grondige vernieuwing van het lesmateriaal.

A History of Reading in the West Nov 08 2020 Literature has not always been written in the same ways, nor has it been received or read in the same ways over the course of Western civilization. Cavallo (Greek palaeography, U. of Rome La Sapienza), Chartier (Ecole des Hautes Etudes en Sciences Sociales, Paris) and a number of other international contributors, address themes that highlight the transformation of reading methods and materials over the ages, such as the way texts in the Middle Ages were often written with the voice in mind, as they would have been read aloud, or even sung. Articles explore the innovations in the physical evolution of the book, as well as the growth and development of a broad-based reading public.

Le manuel scolaire Nov 20 2021 Dans le présent ouvrage, certaines équipes étudient l'utilisation du manuel lors de l'intervention éducative; d'autres se penchent sur le manuel comme discours ou sur la description des pratiques relatives à la conception, à la production et à la diffusion de manuels; d'autres enfin analysent le contenu des manuels, en touchant leurs aspects disciplinaires, didactiques et sociologiques.

Les manuels scolaires, miroirs de la nation ? Sep 18 2021 Un manuel scolaire peut-il dépasser des affrontements nationaux parfois violents ? Comment se construit l'éducation du citoyen, que ce soit dans les manuels d'histoire ou de langue ? Les livres d'écoles ne sont pas ces objets banals et approximatifs qui s'effacent sans lendemain des mémoires adultes. Jouant un rôle qui dépasse la simple transmission de connaissances scolaires, ils sont des acteurs importants de la culture, et des témoins exceptionnels des valeurs.

Writing National Histories Aug 25 2019 This book examines comparatively how the writing of history by individuals and groups, historians, politicians and journalists has been used to "legitimate" the nation-state against socialist, communist and catholic internationalism in the modern era. Covering the whole of Western Europe, the book includes discussion of: * history as legitimation in post-revolutionary France * unity and confederation in the Italian Risorgimento * German historians as critics of Prussian conservatism * right-wing history writing in France between the wars * British historiography from Macaulay to Trevelyan * the search for national identity in the reunified Germany.

Indochina Jun 15 2021 Combining new approaches with a groundbreaking historical synthesis, this is the most thorough and up-to-date general history of French Indochina available in English. Unique in its wide-ranging attention to economic, social, intellectual, and cultural dimensions, it is the first book to treat Indochina's entire history, from its inception to Cochinchina in 1858 to its crumbling at Dien Bien Phu in 1954 and on to decolonization. The authors tell this story from a perspective that is neither Eurocentric nor nationalistic but that carefully considers the positions of both the colonizers and the colonized. With this approach, they are able to move beyond descriptive history into rich exploration of the ambiguities and complexities of the French colonial period in Indochina.-- Back cover

School History Textbooks across Cultures Feb 21 2022 What do school history textbooks mean in the contemporary world? What issues and debates surround their history and production, their distribution and use across cultures? This volume brings together articles by authors from the United States, Italy, Japan, Germany, France, Russia and England, each piece drawing attention to a series of fascinating yet highly specific national debates. In this collection, perspectives on the place and purpose of school history textbooks are shown to differ across space and time. For the student or scholar of comparative education this compilation raises important methodological questions concerning the grounds and parameters upon which it is possible to make comparisons.

Research Anthology on Instilling Social Justice in the Classroom Jun 27 2022 The issue of social justice has been brought to the forefront of society within recent years, and educational institutions have become an integral part of this critical conversation. Classroom settings are expected to take part in the promotion of inclusive practices and the development of culturally proficient environments that provide equal and effective education for all students regardless of race, gender, socio-economic status, and disability, as well as from all walks of life. The scope of these practices finds itself rooted in curriculum, teacher preparation, teaching practices, and pedagogy in all educational environments. Diversity within school administrations, teachers, and students has led to the need for socially just practices to become the norm for the progression and advancement of education worldwide. In a modern society that is fighting for the equal treatment of all individuals, the classroom must be a topic of discussion as it stands as a root of the problem and can be a major step in the right direction moving forward. Research Anthology on Instilling Social Justice in the Classroom is a comprehensive reference source that provides an overview of social justice and its role in education ranging from concepts and theories for inclusivity, tools, and technologies for teaching diverse students, and the implications of having culturally competent and diverse classrooms. The chapters dive deeper into the curriculum choices, teaching theories, and student experience as teachers strive to instill social justice learning methods within their classrooms. These topics span a wide range of subjects from STEM to language arts, and within all types of climates: PK-12, higher education, online or in-person instruction, and classrooms across the globe. This book is ideal for in-service and preservice teachers, administrators, social justice researchers, practitioners, stakeholders, researchers, academicians, and students interested in how social justice is currently being implemented in all aspects of education.

L'Identite Des Eleves Et L'Enseignement de L'Histoire Sep 06 2020 Ce livre est un essai de reflexion sur l'histoire scolaire tunisienne. L'auteur a analyse les contenus d'un manuel scolaire pour reveler leurs references savantes et socio-politiques. La vulgate scolaire est forme d'elements d'une histoire savante transpose de maniere lineaire et deterministe pour servir a la promotion politique des eleves aux valeurs choisies par l'elite politique au pouvoir a savoir le nationalisme tunisien moderne. Le choix des contenus lineaires nuit a l'une des principales competences que developpent l'enseignement de l'histoire a savoir l'esprit

critique, il restreint les opérations d'apprentissage à la simple mémorisation. L'enquête par questionnaire a permis d'aborder le mode d'appropriation de l'histoire scolaire par les élèves et l'impact de l'histoire apprise sur leur identité. Elle a révélé un clivage entre l'identité nationale tunisienne circule par la vulgate scolaire et l'identité des élèves qui est alimentée par le sentiment d'appartenance à une sphère plus large. Ce clivage entraîne des conflits sociocognitifs qui imprègnent l'opération éducative et l'identité souhaitée par l'enseignement de l'histoire, il engendre aussi des acteurs assujettis."

The Nation, Europe, and the World May 15 2021 Textbooks in history, geography & the social sciences provide important insights to the ways in which societies function. L'enseignement de l'histoire en France Feb 09 2021 Traitant de l'enseignement de l'histoire en France de ses premières ébauches jusqu'à nos jours, ce livre soulève des questions majeures. Celle de la place et de l'identité de l'histoire enseignée. Quand et comment s'implante-t-elle dans les établissements secondaires puis à l'école primaire ? Comment y acquiert-elle son autonomie disciplinaire par rapport à l'instruction religieuse et à l'étude des "humanités" ? Quels horaires, quels coefficients et, plus généralement, quelle considération lui sont accordés ? Celle des finalités qu'on lui assigne. L'histoire est une discipline dont le caractère politique est particulièrement net, tant par les sujets qu'elle aborde que par la relation intime et complexe qu'elle entretient avec la mémoire nationale. Comment se décline, au fil du temps, cette finalité politique ? Quels autres objectifs l'enseignement de l'histoire se voit-il fixer ? Celle des programmes. Qui les rédige ? Comment sont-ils construits ? Quelles périodes, quels territoires, quels aspects de la vie des hommes du passé privilégient-ils ? Quelles instructions sont données pour leur mise en œuvre ? Celle des rapports que l'histoire scolaire entretient avec l'histoire universitaire. Dans quelle mesure les problématiques, les méthodes et les avancées historiographiques de la recherche se diffusent-elles dans les programmes, instructions, manuels scolaires et dans les pratiques des enseignants ? Celle, enfin, de ce qui se passe en cours d'histoire et de l'impact de ces cours sur les élèves. À travers ces questions, c'est bien l'élaboration d'une identité culturelle collective qu'on verra à l'œuvre, et les débats politiques et intellectuels qui l'accompagnent.
