[Ecosystem Collapse and Recovery](#) Nov 02 2022 There is a growing concern that many important ecosystems, such as coral reefs and tropical rain forests, might be at risk of sudden collapse as a result of human disturbance. At the same time, efforts to support the recovery of degraded ecosystems are increasing, through approaches such as ecological restoration and rewilding. Given the dependence of human livelihoods on the multiple benefits provided by ecosystems, there is an urgent need to understand the situations under which ecosystem collapse can occur, and how ecosystem recovery can best be supported. To help develop this understanding, this volume provides the first scientific account of the ecological mechanisms associated with the collapse of ecosystems and their subsequent recovery. After providing an overview of relevant theory, the text evaluates these ideas in the light of available empirical evidence, by profiling case studies drawn from both contemporary and prehistoric ecosystems. Implications for conservation policy and practice are then examined.

The Quirks & Quarks Guide to Space May 16 2021 For everyone who's curious about what's new under (and over and around) the stars. Douglas Adams famously pronounced in *The Hitchhiker's Guide to the Galaxy* that the answer to life, the universe, and everything was 42. Quirks & Quarks, whose approach to science owes almost as much to Adams as it does to Newton or Einstein or Hawking, have flipped that notion through a gap in the space-time continuum (or something like that) and come up with answers to the 42 essential questions about space. Much about the universe is very hard for most of us to grasp, and if anyone can explain these mind-bending aspects of the heavens above, it's the Quirks & Quarks producers, who have been bringing Canadians understandable science, with trademark humour, for more than thirty years. In their *Guide to Space*, they answer such pressing questions as Where does space begin? Why is most of the universe missing? Is there intelligent life in the universe? And the real puzzler: What came before the Big Bang? They also answer questions we wish we'd thought to ask, such as Can you surf a gravity wave? and Why is the universe's temperature on my TV? There are answers as well to far more practical questions, like What happens when you fall into a black hole? and How will the universe end? The answers, which have been vetted by a team of astronomers, are witty, authoritative, in-depth, accurate, up-to-date astronomically, and, of course, quirky.

This is followed by a collection of 71 EMQ themes, with a total of 291 questions for the reader to attempt. The questions are based on common clinical scenarios and cover a variety of topics. Answers are included after each topic, and these include explanatory material and useful references. With a concentration on the core areas of the syllabus and a wide and varied selection of practice EMQs, this book will be an invaluable addition to the bookshelves of all candidates in preparation for the MRCOG Part 2.

Preppers Survival Pantry! Discover This Guide About How To Effectively Use Survival Pantry Techniques For Beginner's Nov 29 2019 The prepper's pantry is a very important part of their survival kit. It usually consists of a large refrigerator that stores a lot of perishables and canned goods, a small stove with stoves, some utensils such as knives, large pots, pans, baking pans and the most important, a collection of freeze dried foods. They have a variety of different foods to provide for different needs for example, if someone in the family is diabetic they may need a special type of diabetic food or they may just need something to keep them warm during severe weather. This guide will give you some tips on what foods you should have on hand. This guide will also give you information on what foods you should avoid having in your preppers pantry. This will help ensure that you are providing for your family's needs instead of just going off half-cocked when disaster strikes. You want to be prepared so that you do not have to rely on others to feed you. Following this guide will ensure that you have enough food storage to last you through at least two weeks without any problems. If you have a prepper in your family, it is very important to talk to him or her about the type of pantry they have. In fact, many preppers are starting to do their own grocery shopping so that they know where to buy the best foods at all times. This will save them a lot of money. Some families even go so far as to buy freeze dried foods that are packed in cans. It saves them time, because it can get overwhelming to sort through all of the different brands. Another thing you should have in your hidden preppers pantry bed are multiple cans of powdered drinking water. Many preppers depend on canned foods for their survival food supply. However, most people that live in an area where there is no running water do not know how to properly store the canned foods. With the proper pantry and a good storage system, you can easily prepare healthy meals for your family.
