Frontiers in Industrial Mycology Dec 02 2019 *Frontiers of Industrial Mycology* describes the present efforts underway to create a broad range of large-scale applications using filamentous fungi. Important and environmentally sound applications currently being developed include the use of fungi for novel β -lactams in antibiotic production, biobleaching and the bioconversion of wood pulp, agricultural biotechnology for creating biological insecticides and herbicides, food fermentations, and the commercial raising of shiitake mushrooms, a growing and largely untapped market in North America. The topics discussed in this volume are on the cutting edge of industrial mycology. This book will thus benefit a wide range of professionals and academics in biotechnology, mycology, microbiology, plant science, entomology, and biochemistry.
